

Masters Course in Cadaver Injectables

for Aesthetic Procedures

5-6 March 2019, Cairo

The course will cover

- Botulinum toxin and fillers
- Facial anatomy and landmarks
- Facial aging (skin, subcutaneous tissue, muscles and bones)
- Facial volume loss and structural changes in different tissue layers

Practical training will be on cadaver heads, enabling discussion regarding use of needles and cannulas and correct plane and injection technique, emphasizing facial muscles and blood vessels.

**Low Cadaver to
delegate ratio**

You will be able to go through:

Upper face

forehead, glabella,
eyebrow, Crows' feet

Midface

tear trough, cheeks,
malar region

Lower face

nasolabial folds, lips

Important facial arteries

Danger zones

After completing this course

After completing this course, you will gain high quality training, increase your expertise, recognize and differentiate when to use and how to perform injectables, know facial landmarks and depths and be proficient in patient consultations and selection.
